

Box of Bones Timeline

An extension of "Searching for the bones of Peking Man"

We use timelines to see the sequence of events clearly. Let us create a timeline to show what happened to the fossils of the Peking Man since the time of its discovery. For a more exciting experience, you may wish to create a poster using mahjong paper.

INSTRUCTIONS

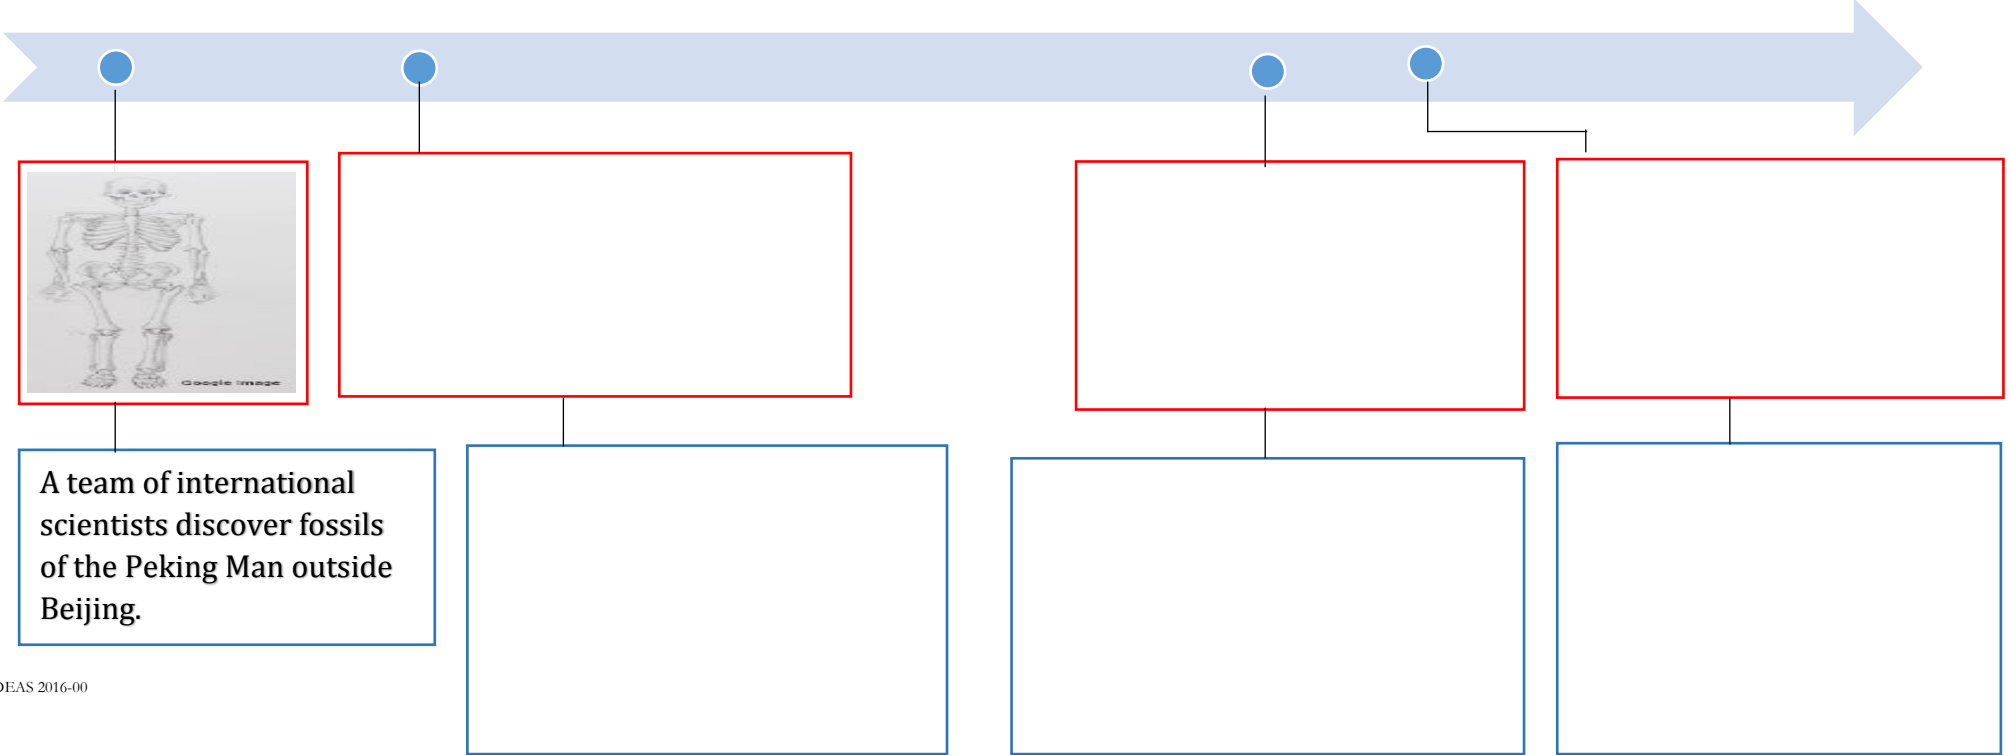

The long arrow represents time increasing from left to right. The dots on the arrow represent the years when important events regarding the fossils occurred. In the first box below each year draw a picture that represents what happened. In the second box below it, write a brief account of what happened in that year. See the example.

1921

1941

2005

2010

A team of international scientists discover fossils of the Peking Man outside Beijing.
