## Quick Poll: The Winning Team?

*An extension of "World Cup 2018"*

Read **"World Cup 2018"** (page 23, *What's Up* May 2018). As the excitement mounts, fans are guessing which team will walk away with the trophy. Take a quick poll — a mini survey — to find out what your peers' predictions are.

### INSTRUCTIONS

1. Group yourselves into project teams of four or five members each. Each group member should poll five students (no student should be polled by more than one of you).
2. Before you conduct the poll, use the *What's Up* story to introduce the topic of the World Cup. Then, ask the following question. Record their answers in the table below.

Question	1 <sup>st</sup> student	2 <sup>nd</sup> student	3 <sup>rd</sup> student	4 <sup>th</sup> student	5 <sup>th</sup> student
Which team do you predict will win the World Cup 2018 trophy?					

3. When all of you have polled five students each, collate your group members' data in the table below. List the four teams that were mentioned the most often. Calculate the percentages.

Responses to our poll question	Team:	Team:	Team:	Team:	Total polled
Our group's raw data (number of students)					
Our group's data expressed as percentages	%	%	%	%	100%

4. Present your findings to your class by using either a histogram or pie chart. Did your findings surprise you in any way? Reflect on what polling felt like.
