

A Big Idea for Our Classroom Project

An activity of "The smartwatch that saves lives"

Read "**The smartwatch that saves lives**" (pages 14-15, *What's Up* May 2019). Professor Picard's amazing invention began with a classroom experiment.

We may not always realise it, but the classroom is a great space for creativity. As concepts and information are shared in class, teachers and students around the world use this knowledge in fresh new ways. Just as Prof Picard's smartwatch project did, your classroom projects could lead to groundbreaking inventions too.

1. Using your scientific imagination, share your wildest and most ambitious ideas in a small group. Together, imagine a class project of your own that may lead to an important discovery or invention for mankind.
2. Sketch or note down your ideas in the space below. When you are done, share your idea for an invention or discovery with your class.

Our group's big idea to help mankind:
