

Poster: Don't Waste Food!

An activity of "Rice-drying machine by youths improve rice yields"

1. Read "**Rice-drying machine by youths improve rice yields**" (page 14, *What's Up* July 2019).
2. With your partner, go online and do some research on food wastage in Singapore. Look for five to six interesting facts.
3. Now, design a poster about food wastage. These posters will be used to teach children in kindergarten about the topic. Make sure to include the interesting facts that you have found.

You may either use the space provided below or design your poster using a computer.

Before you start, consider the following points:

1. What facts will you choose to include?
Will they encourage your viewer to do something about food wastage?
2. Is your language simple enough for kindergarten children to understand?
3. How can you make your poster look more interesting?
4. As students, what can you do about food wastage?
