Chimps & Humans

An activity of "Hope for a rare primate"

Read "**Hope for a rare primate**" (page 15, What's Up July 2020). Did you know that chimpanzees share a high percentage of our DNA? In fact, some scientists say that chimps are more closely related to humans than they are to gorillas.

1. Do some research about the similarities between human beings and chimpanzees. Here are some links you can start with:
 - Ten ways chimps and humans are the same (by Anna Muir)
<https://janegoodall.ca/our-stories/10-ways/>
 - Chimps vs humans: Memory test (BBC Earth): shorturl.at/aexl4
 - Making a chimp laugh (BBC): shorturl.at/mvGHX
2. On a separate piece of paper, draw an infographic or scientific poster to present your findings. You may plan or sketch your draft in the space below.

A large, empty rectangular box with a thin black border, intended for students to draw an infographic or scientific poster based on their research.
