Winter Sports: Alike & Different

"An activity of "Cool sports to check out at next month's Winter Olympics"

"Cool sports to check out at next month's Winter Olympics" (page 22-23, *What's Up* January 2022) is an exciting photo essay about some of the sporting events that will be held at the Winter Olympics. Imagine how much more enjoyable watching the Winter Olympics would be if we knew more about the sports? First read the *What's Up* story and study the pictures. Then, work in pairs and plug into the correct sections of the Venn circles below, commonalities as well as differences between three winter sports: curling, the luge, and alpine skiing. If you need more space, reproduce the Venn diagram on a large sheet of paper.

Discuss with your partner how this activity might help you to enjoy watching the Winter Olympics this year.
