

Lost in Another Time

An activity of "Cave Discovery Shows Modern Humans Lived in the Same Time as Neanderthals"

Read "Cave discovery shows modern humans lived in the same time as Neanderthals" (page 16–17, *What's Up* April 2022). Do this activity with a classmate or friend.

- 1a) Take one role each, either: a **Modern Kid** or **Stone Age Kid**.
- b) Draw how you look like in your role. Come up with a few possible props to suggest which time zone (Modern or Stone Age) you come from. Here are a few examples:

I look like this as a <input type="checkbox"/> Modern Kid <input type="checkbox"/> Stone Age Kid.	Props
	<p>Spear</p> <p>Cap</p> <p>Bag</p> <p>Animal-skin clothes</p> <p>Fire</p> <p>Drink</p>

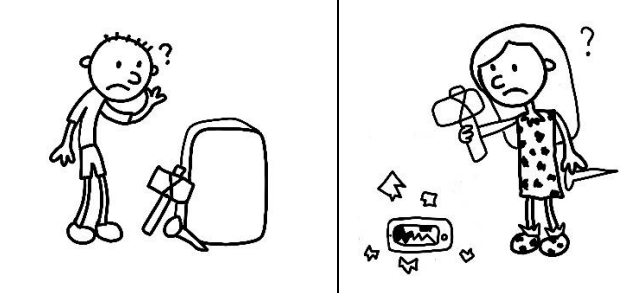

- c) Come up with a daily activity in your respective roles. For instance, the activity could be "Playing with Toys". Hence, the two of you might look like this:

Activity #1: Playing with Toys	
<p>Modern Kid →</p>	<p>← Stone Age Kid.</p>

Try it out! Come up with another daily activity, and draw the two of you doing it.

Activity # 2:	Activity #2:
<i>Modern Kid in Modern day</i>	<i>Stone Age Kid in Stone Age</i>

d) Next, switch time zones while still keeping your role. For instance, if you are the Modern kid, you are now Modern Kid in Stone Age. And, if you are the Stone Age Kid, you are now Stone Age kid in Modern day. Take turns stating a daily activity in your respective roles, for instance, "Leaving a message".

Activity #3: Leaving a message		
Modern kid in Stone Age →		← Stone Age Kid in Modern day

Try it out! Come up with a daily activity each, and draw it on your respective sheets.

Activity #4:	Activity #4:
<i>Modern kid in Stone Age</i>	<i>Stone Age Kid in Modern day</i>

3. Do you think you would prefer living in the Stone Age or in Modern day? Share your thoughts with your class. Give specific examples to illustrate what you mean.
