

Compare and Contrast

An activity of "Why our ancestors built these giant calendars"

A Venn diagram is a useful way to note down the similarities and differences of two or more things. Read the two sections on Nabta Playa and Goseck Circle in the article "**Why our ancestors built these giant calendars**" (pages 16–17, *What's Up* June 2022). Then, jot down the similarities in the space where the two circles overlap; and what is unique about each place in its respective space. To think about: What does your Venn diagram tell you about these two places in relation to each other?
