

The Shapes Around Us

An activity of "The sphere factor"

In "The sphere factor" (page 14-15, *What's Up* October 2022), we learn about the characteristics of spheres and why they are found everywhere. What other shapes have you observed around you? Work in pairs on this activity.

1. Give an example for each shape below and draw it in the column on the right.

<p>a) Cube Three-dimensional shape with six square faces</p>		Example:
<p>b) Cuboid Three-dimensional shape with six rectangular faces.</p>		Example:
<p>c) Concentric circles Multiple circles which share a centre point.</p>		Example:
<p>d) Hexagon Two-dimensional shape with six equal sides.</p>		Example:
<p>e) Triangle Two-dimensional shape with three sides.</p>		Example:
