Sounds from the Ocean

An activity of "Ocean Zones".

Carefully study the poster "Ocean Zones" (page 14-15, *What's Up* May 2023) to see where different sea creatures live. Form small groups to carry out this whole-class activity.

1a) In your group, select one creature from each of the different zones. Gather information about the five creatures. Focus especially on how each one moves underwater and any sound(s) it makes. Fill in the table in point form.

Zones	Animal	How it moves	Sound(s) it makes
Land (<0m)			
Epipelagic (0-200m)			
Mesopelagic (200-1000m)			
Bathypelagic (1000-4000m)			
Abyss (4000-6000m)			
Hadal (>6000m)			

- b) Select your favorite sea creature. _____
- c) Brainstorm and choreograph a dance (or music and movement presentation) that represents the characteristics and movements of your sea creature.
- Use your creativity to make it look unique and interesting.
 - Use any combination of instruments/ sounds made by objects/ your own vocals
 - Explore/ create different rhythms and tempos
- d) Have each group perform for the class to celebrate World Ocean Day and pass on the message that it is important to protect the ocean. You could also present it as a class during assembly.

Have fun!
