My School's Community Spirit

An activity of "Good things happen when people reach out and help one another"

When you are comparing two or three items, it can be useful to note down their differences in a table. The article "Good things happen when people reach out and help one another" (pages 22-23, *What's Up* July 2023) tells us about mutual aid and cooperation around the world.

1. After reading the article carefully, fill in the first two columns with information from the article.
2. For the third column "My school's community spirit", write your own answers.

	Minga	Gotong royong	My school's community spirit
What is it?			
Where does it occur?			
What is an example of it?			
How do people benefit from it?			

3. Reflect on whether using a comparison table like this would help you to compare and contrast other items as well.
