## An EV Board Game

*An activity of "China's carmakers are rising fast"*

Read the article "China's carmakers are rising fast" (page 6, *What's Up* July 2024). Then, make a simple board game about electric vehicles (EVs). Here's how.

- Using the article and other sources, gather more information about EVs. Here is a source to start with: ➤ <https://www.factretriever.com/electric-car-facts>. Jot down your main points below.

Facts I learnt about Electric Vehicles	

- Construct five questions and provide their answers based on facts you have gathered.

	Question	Answer
a		
b		
c		
d		
e		

3. In small groups of three to five members, develop a simple board game about EVs.

- Write down questions with their answers on the challenge cards.
- Design your tokens/ pieces to represent each player.
- Cut out the cards and necessary pieces.
- You will also need a dice (otherwise, use a coin) to play the game. Have fun!

(write more questions with the answers.)

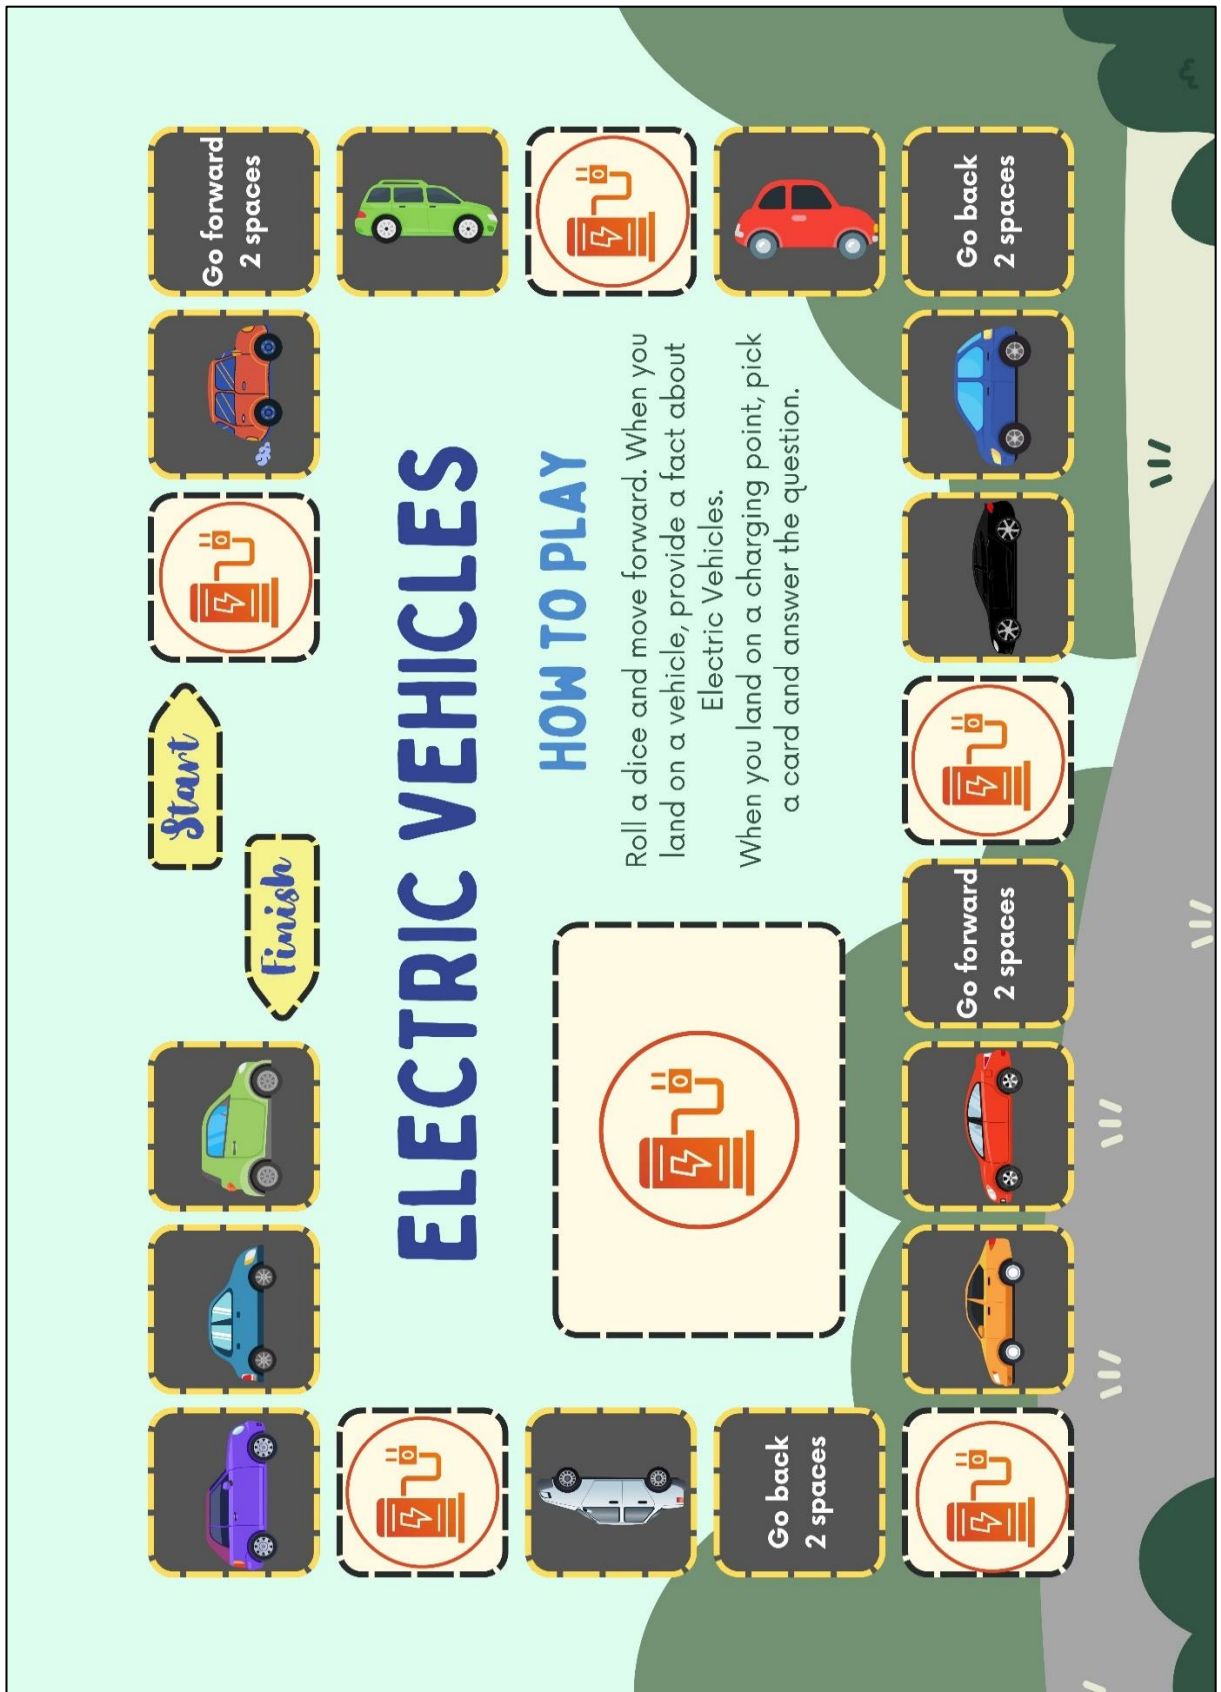

Where can you charge an EV? <small>(Ans: At homes or parking lots that have charging stations)</small>		

(cut out cards and place face down on main charging point.) 

(write more questions with the answers.)

(Design your own EV tokens and cut them out)

4. Field test your game by asking another group to play it and give suggestions for improving it. Consider that group's feedback to help you finalise your board game.
