Mind Maps: Beat the Heat!

An activity of "Helping farm workers to beat the heat"

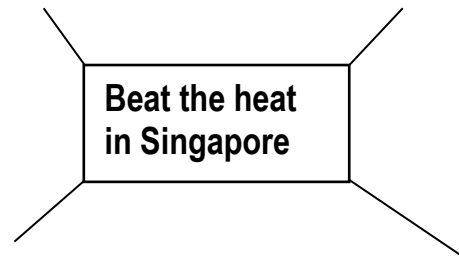

In "Helping farm workers to beat the heat" (page 16, *What's Up* August 2024), we learn about how workers across the world stay safe amid rising temperatures. Read the article carefully.

1. Work in pairs or threes to identify the actions taken to help workers cope with the heat. Complete the first mind map below, with each action branching out as a separate line. One has been done for you as an example.

Wear a damp bandana around the neck or head.

2. Discuss with your partner(s) what you can do in Singapore to stay cool despite the heat. Complete this ↓ second mind map with your suggestions.

3. Share your second mind map with your class. Compare your ideas with those of the others. Try out these suggestions when the next heat wave strikes!
