An Advert for Our Mini-EV

An activity of "Tiny electric cars are changing how people commute in cities".

Mini electric vehicles (EVs) are budget-friendly and popular among city dwellers. With their compact size, they look adorable too! Read "Tiny electric cars are changing how people commute in cities" (page 8, *What's Up* August 2025). Work in small groups on this activity.

A. In the *What's Up* story, Zuo shared feedback on her mini-EV. List her likes and dislikes in the table below.

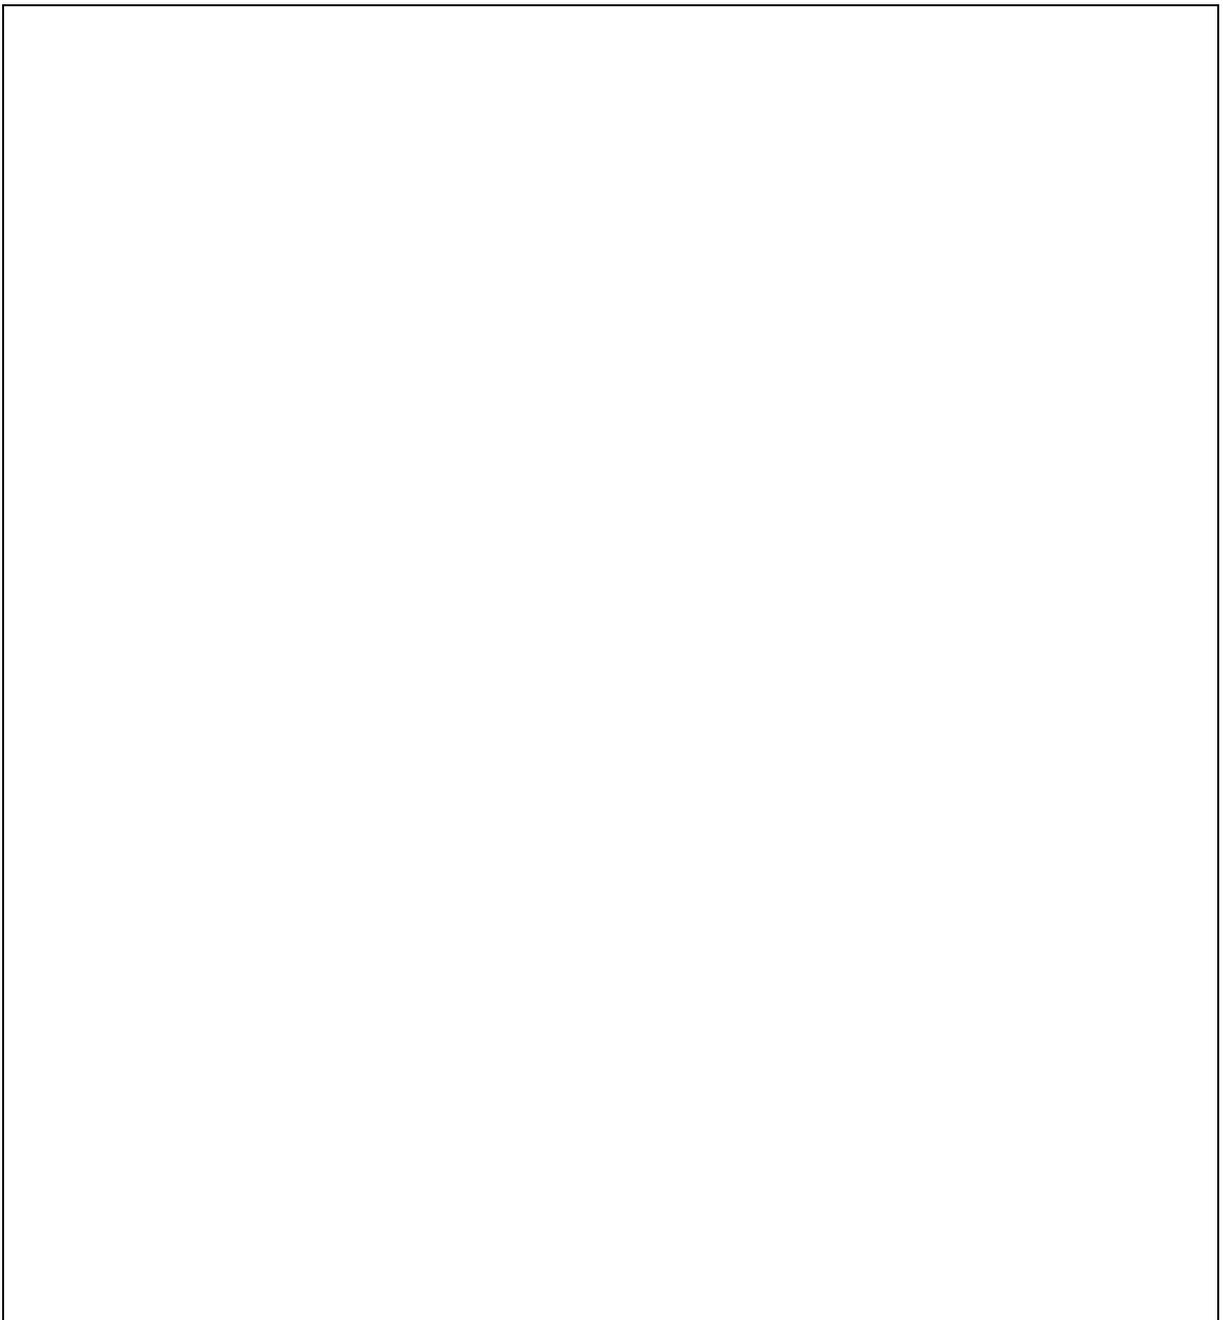

Zuo's comments about Mini-EVs	
Likes	Dislikes

B. Discuss with your group how the mini-EV can be improved on. List your ideas below.

C. Design a new and improved mini-EV and create an advertising poster (or a PowerPoint slide) for it.

The poster should include:

- A drawing of the EV
- Its name
- A tagline for the EV. Make it short, clear and catchy, e.g. "*A diamond on wheels*"
- A few special features of the EV
- The selling price
- Where to get more information, e.g. a website, a showroom, or via QR code.

D. Present your group's new and improved mini-EV to the class using the poster/slide.
